

Serie Atlantic

Special boards for prefabricated material industries

TECHNICAL CHARACTERISTICS

► Manufactured with selected "Maritim Pine" Wood (P.pinaster ssp atlántica). It is a hard yet pliable wood, a quality that make it an ideal product for the prefabricated material production.

► An ultra-resistant double assembly system embedding 10 cm beams between boards. The beams act as internal structure, enabling the vibration to be distributed evenly over the entire surface of the pallets. The boards are glued together with polymerised resin.

(Migamad is the only manufacturer that use this complex assembly sytem)

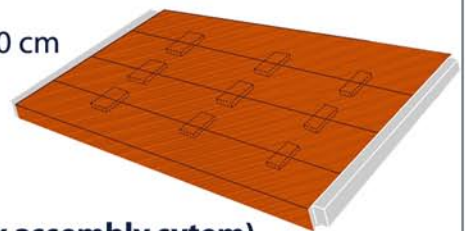

► Galvanized Steel "C" profile secured with triple folded closed ends.

► Sarrated grooves along the profile ensure secure fastening.

► Calibrated and sanded on both faces of the pallets.

► Fungicide/Insecticide treatment level 3.

► Walnut color finish.
